B.2 LOCATION

All Work is to be performed around the City of Prairie City, Oregon.

B.3.2 Grant Soil and Water Conservation District (District) will enter into a Contract with a qualified vendor to conduct the above Work and will administer the Contract and finances of the Project.

B.4 SEQUENCE OF WORK

It is understood that time is of the essence in the execution of this Contract. All Work elements must be completed by December 31st, 2025.

B.5 PRINCIPAL COMPONENTS OF WORK

B.5.1 All participating property owners have signed Cooperator Agreements with the District to allow the Work; however, Contractor shall be responsible for contacting owners to inform them regarding the details of when the Work will be conducted.

B.5.2 Treatment of 63 acres of Juniper through cutting, piling and burning in accordance with Section C – Site Work.

B.5.3 Treatment of approximately 0.5 acre of Blackthorn shrub infestation on one site.

B.6 MINIMUM AREA

Impacts will be confined to the minimum area necessary to complete the Project.

SECTION C – SITE WORK

C.1 JUNIPER CUTTING

Work item shall consist of cutting or clipping all juniper from seedlings to mature trees within the treatment areas.

- Stump heights shall be less than twelve (12) inches (uphill side); trees shall be completely severed from stump and all living vegetation on the stump or attached by branches will be sheared and removed.
- Acceptable juniper cutting methods can include chainsaws, loppers, hand saws or mechanized equipment with mounted hot saws, hydraulic shears or other District approved methods. Mechanized cutting will be done when soils are dry or frozen; removal practices will be performed to minimize soil disturbance.
- Junipers to be left after the project (“Leave Trees”) will be individually flagged prior to work commencing and pruned as described below

C.2 LEAVE TREES PRUNING

Work item shall consist of pruning limbs from flagged Leave Trees in order to reduce their ability to function as ladder fuels.

- All live and dead limbs shall be pruned around the bole up to 4 feet from the ground.
- Limb stubs shall be flushed cut with the branch collar while keeping the bark layer intact.
- Pruned limb stubs attached to the tree shall be less than 2-inches.

C.3 SLASH PILING

Work items shall consist of piling juniper trees and limbs generated during cutting.

- All cut trees shall be moved so no part is within five (5) feet of any part of a live tree; piles should also be no closer than five (5) feet from any part of a live tree.
- Piles shall be constructed in such a manner as to easily ignite, combust completely, contain fire within the pile perimeter and do minimal damage to residual trees.
- In order to facilitate rapid and more complete combustion of slash piles, it is recommended they be constructed by stacking smaller diameter material on the bottom and placing larger diameter material on top. Keeping the curvature of placed material in the same direction consistent the piled limbs will result in denser piles; a dense inner portion of the pile maintaining minimal void spaces covered by a looser outer layer will typically burn the best.
- Minimum pile size shall be 5 feet high and 6 feet wide by 6 feet in length; it is recommended piles be no larger than 12 feet in length or width as measured three feet from the ground surface.
- Piles should be spaced sufficiently far enough apart as to prevent unintentional ignition during burning.

C.4 PILE BURNING

Work items shall consist of burning the slash piles in such a manner that they are completely consumed while not damaging live trees.

- Contractor will provide the District with timelines for anticipated slash pile burning activities in order for the District to communicate with ODF and secure necessary permits.

C.5 MEASUREMENT AND PAYMENT

C.5.1 Juniper Cutting/Pruning/Piling/Brushing/Burning:

- **Measurement:** The perimeter of the area around the stumps after the junipers have been cut and piled will be measured in the field to the nearest tenth (0.1) of an acre.
- **Payment:** Price per acre of work performed as stated in the pricing schedule. Payment will only be issued for fully completed and District approved portions of the project area.
